Databases: MSSQL, MySQL, MongoDB, Oracle 10g, Hibernate, JPA

Other: SOA, REST, SOAP, OOD, TDD, SCRUM, KANBAN, Eclipse, JUnit, Maven, Tomcat, Jboss

Professional Experience

Software Engineer – Central Civic Integration Database

Mar 2012 to Present

Creating unified SOA system for different .gov groups. This included an array of web services (REST/SOAP), and several UIs to manage 42K client immigrant dossiers each year.

- Helped overcome the challenges of RealDolmen's biggest multi-million dollar project yet.
- Provided significant dev work on key components processing about 97K+ enrollments/year and built a robust system for 389 government employees every day.
- The project also successfully provided civic integration during the Syrian refugee crisis, providing an extra strain and strong challenges for our systems.

Junior Software Engineer – 3E Renewable Energy Consulting

Nov 2011 to Jan 2012

Prototype responsive HTML5 web application for tablets and desktop alike for energy plant management.

- Created a highly extendable search engine for this specific usecase with Spring and jQuery

Internship – Janssen Pharmaceuticals

Feb 2011 to Jun 2011

Development of KNIME nodes and workflows which were integrated into the PHEADRA system for routine blood research using Flow Cytometry (Cell Filtering and Spillover Compensation).

- Learned and worked with an awesome niche framework and was able to hone my skills in a complicated but highly satisfying scientific context.

Certifications (Pearson Vue – Oracle)

Java EE 6 Enterprise JavaBeans Developer Certified Expert

Dec 2014

Java EE 6 Java Persistence API Developer Certified Expert

Jul 2012

Java Standard Edition 6 Programmer Certified Professional

Jan 2012

Education

Katholieke Hogeschool Kempen

2008 – 2011

Bachelor of Computer Science, Application Development, Cum Laude
